

Meet The **GRAD STUDENT** **Andi Delgado**

What most excites you about your field?

I love the ocean, so that explains the marine bit, but I'm really interested in learning about organisms' responses to climate change-related stressors and being able to make fishing and aquaculture sustainable in our climate change world.

Where did you move from?

Technically, I'm from Rancho Cucamonga, CA, but Northfield feels more like home.

- Dowd Lab
- Pullman Campus

Life before grad school:

I just graduated from Carleton College in Northfield, Minnesota with my BA in Biology and a minor in Japanese~

Fun fact

I play the organ :)

Can't live without:

Soup. I live believing that soup is the best genre of food~
