

# Meet The **GRAD STUDENT** **Jake Green**

## What most excites you about your field?

What excites me the most is knowing that I think in the long run my research has the potential to have a great impact on how we cultivate potatoes.

- Hellmann Lab
- Pullman Campus

## Life before grad school:

I was an 8th grade biology teacher before I moved to Pullman. I got a double major in education and biology from the University of South Alabama.

## Where did you move from?

I moved here from Alabama. I miss my family dearly, but I am beyond grateful for having the opportunity to move to Washington.

## Fun fact

A fun fact about me is I am colorblind and once had the opportunity to dig up dinosaurs in Montana.

## Can't live without:

One thing that I can't live without is my cat, Honey. She is my little piece of home here in Washington.
