

Meet The **GRAD STUDENT** **Fidelia Lare**

What most excites you about your field?

My current research is completely outside of my comfort zone, which excites me! I also enjoy the aspect of my research contributing to the existing body of knowledge, however small my own role in it may be!

- Cousins Lab
- Pullman Campus

Life before grad school:

I was an undergraduate student here at WSU studying Biochemistry (pre-med). I spent most of my time as an undergrad researcher in an inorganic chemistry lab!

Where did you move from?

I was in Pullman for my undergrad but moved here from Germany!

Fun fact
I am fluent in five languages!

Can't live without:
Tea
