

Meet The **GRAD STUDENT** **Destiny Brokaw**

What most excites you about your field?

The wide diversity in the organisms of study and solving puzzles of evolutionary history with clues we find along the way whether this be shown morphologically or by 'code' in the genome.

Where did you move from?
Auburn,
Alabama

- Roalson Lab
- Pullman Campus

Life before grad school:

I was completing my Master's in Plant Pathology at Auburn University. My thesis was over the community dynamics of the phyllosphere microbiome.

Fun fact

I am left-handed and enjoy hand embroidery, camping, and hiking.

Can't live without:
H2O and my dog,
Winston Kite
